ELTE / Numsys

Target site: SZTAKI Desktop Grid: http://szdg.lpds.sztaki.hu/szdg/
Summary of policy:
- Jobs/workunits are generated locally on the target dg site by a boinc master daemon
- Job submission is continuous.
- New version of application can only be deployed by the operator.
- Every input and output is handled/managed by the operator.
- In case of problem, operator must detect it.
- Finished jobs are removed from the target DG server by the operator.
- Results are delivered to the user time-to-time by the operator.

Summary of activities:
- 65.000 workunits have been executed in the last 9 months
- Errors requiring SZTAKI experts to handle did not happen, however continuous monitoring of the site operation was performed and maintenance were carried out.
